Architect	Kubik Interiørarkitekter
Collection	Create Fabrico
Area	900 m ²
Year	2017

YINSON NORWAY

By combining planked wood ceilings with painted blue walls and contemporary flooring, the Norwegian architecture firm Kubik Interiørarkitekter created a spectacular interior design concept in Yinson's Oslo office. The traditional Scandinavian timber ceiling and the modern Bolon flooring stands in contrast to one another, contributing to a sophisticated blend between traditional and contemporary. As well as providing Yinson's employees with an impressive office design, this newly renovated office offers the most spectacular views of the Oslo fjord landscape.
